## **Assignment-1**

Autonomous | Affiliated to Anna University, Chennai Accredited by NAAC with 'A' Grade | NBA (ECE, EEE, CSE, MECH & IT)

**Domain:** IOT

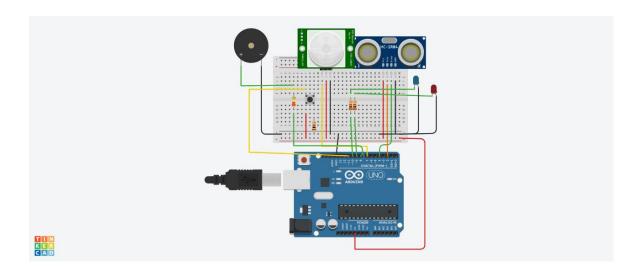

**TOPIC: SMART HOME** 

**NAME: SURYA R** 

TEAM ID:PNT2022TMID12757

COLLEGE: KARPAGAM COLLEGE OF ENGINEERING

## **Smart Home Circuit:**

## **Components:**

| Quantity | Components                 |
|----------|----------------------------|
| 1        | Push Button                |
| 1        | Red LED                    |
| 1        | Blue LED                   |
| 1        | PIEZO Buzzer               |
| 1        | Ultrasonic Distance Sensor |
| 2        | PIR Sensor                 |

| 2 | Resistor(220,560,10K) |
|---|-----------------------|
| 1 | Arduino R3            |
| 1 | Breadboard Small      |

```
Code:
const int trigPin = 2; //the trig pin of the ultrasonic sensor; sends signal
const int echoPin = 4; //the echo pin of the ultrasonic sensor; detects signal
const int pirPin = 7; //the PIR sensor pin
int pirState = LOW; //basically means that the PIR sensor starts as low and detects no
motion
const int buzzerPin = 8; //the buzzer has been connected to pin 8
const int redLED = 9; //the red LED; intensity can be controlled to change the colour emitted
int redBright = 0; // how bright the LED is
int redFade = 5; // how many points to fade the LED by
const int greenLED = 10; //the green LED; intensity can be controlled to change the colour
emitted
int greenBright = 0; // how bright the LED is
int greenFade = 5; // how many points to fade the LED by
const int button = 13; //button to momentarily reset all the sensors back to normal
void setup() {
